### Shock Snap

Screenshot software for Windows users Taking screen captures is easy and fast with Shock Snap, the perfect way to capture the screen and any Windows application with a one-click. Feature Support Frame Grab: Lets you grab individual window frames and stretch them to the whole screen. Selection Grab: Lets you grab the active window selection and stretch it to the whole screen. Custom Grab: Lets you capture the control, window, desktop region, resizable rectangle, full screen, video, and window icon. Save/Share: Lets you save the captured image in several formats (BMP, JPG, PNG, and GIF), and share it via Email, Dropbox, FTP, or Evemote. Image Editing: Allows you to insert custom photos (e.g. GIF, JPEG, BMP, ICO, EMF, PNG) into your captured image and edit them. Application/Window: Lets you zoom in and out of your captured image and rotate it to any angle. Image Cropping/Resizing: Lets you crop the image to a specific size and resize it. Image Effects: Lets you apply any of the effects listed above to your captured image (noise, grayscale, and color inversion). Image Masking: Lets you highlight the image areas with a specific color (white, black, red, green, or blue). Image Text: Lets you draw text over your captured image and set the text color, size, and font. Audio Notifications: Lets you play a custom sound and notification when you capture a new image. Custom Hotkeys: Lets you reassign user-defined hotkeys to activate the capture modes listed above. Connection Management: Lets you access your saved images and snapshots from anywhere by using a network drive or internet cloud. The program's support is limited, but it still functions as expected. The only feature that needs improvement is its lack of support for capture options such as creating backups, recording key strokes, allowing you to select multiple screens to capture, preserving the original captured image, and capturing multiple screens simultaneously. When you set up Shock Snap's main parameters, the program lets you select the target area for image capture, set capture size and orientation, choose the capture format (JPG, BMP, GIF, PNG, or ICO), select image editing and image rendering options, and pick an output folder where the screenshots are saved. To begin the actual capture, just click on the "
